

# COMPANY PROFILE

**Metal Building Resources (MBR) has been a leader in the US construction industry since 2012, specializing in high-quality metal building projects. We prioritize client satisfaction with a seamless journey from start until completion.**

*"Thank you for considering a partnership with MBR for your project. With a degree in architecture and two decades of experience in the construction industry, I established MBR with a vision to provide a superior, concierge-style service to our clients. Despite leveraging advanced technology for efficient project management, we prefer "old school" when it comes to communications with our customers to ensure a clear understanding of expectations and successful project outcomes. Our commitment to you is simple: We do what we say we are going to do, within budget!"*
